

APPLICATION DEVELOPMENT AND EMERGING TECHNOLOGIES COMPREHENSIVE INTERVIEW GUIDE

Prepared For:

Johneros Puyo

Prepared By:

Jenefer Z. Ignacio

Course and Section:

BSCS – 3A

Date of Submission:

September 12, 2026

Introduction & Interviewer Instructions

This comprehensive interview guide, prepared by TechVision Consulting Inc., aims to assess the current state, technological readiness, and capacity of Manila Manufacturing Corporation (MMC). As a medium-sized company, it is important to identify MMC's specific operational needs as it seeks to adopt emerging technologies to modernize operations, improve efficiency, and remain competitive in the market.

I. Purpose of the Interview

This interview aims to evaluate MMC's current operations, challenges, technology awareness, skills, budget, and readiness. TechVision Consulting Inc. will use the information gathered to develop a technology adoption recommendation report for MMC.

II. Interviewer Instructions

1. Introduce yourself as a Technology Analyst from TechVision Consulting Inc. and explain the purpose of the interview.
2. Inform the interviewee that the questions focus on MMC's manufacturing operations and potential adoption of emerging technologies.
3. Allow the interviewee to explain their answers thoroughly before asking follow-up questions.
4. Record important responses, operational pain points, and specific examples provided by the interviewee in the space provided.
5. Use probing questions such as "Why?" "How?", and "Can you elaborate?" when you need clarification.
6. Avoid leading the interviewee toward a particular technology.
7. Thank the interviewee for participating and outline the next steps.

Interviewee Information

Full Name: _____

Job Title / Position: _____

Department / Unit: _____

Years of Service at MMC: _____

Email / Contact Details: _____

Date & Time of Interview: _____

1. Background and Current State

Question 1: What are MMC's main operational goals this year, and what major problems is the company facing right now?

Follow-up: How are these problems affecting MMC's overall growth and daily business?

Response / Notes:

Question 2: Can you walk me through MMC's main manufacturing process, and where on the factory floor do delays usually happen?

Follow-up: How do these delays impact your delivery times to customers?

Response / Notes:

Question 3: What basic machines, software, or digital tools is MMC currently using to automate work on the factory floor?

Follow-up: As factory tools have evolved, how well do your physical machines connect with your computers today?

Response / Notes:

2. Technology Awareness and Readiness

Question 4: How familiar is MMC's leadership team with emerging technologies like AI, Cloud, and IoT, and how do they stay updated on new tools?

Follow-up: How does management determine whether a new technology would be practical and beneficial for MMC's operations?

Response / Notes:

Question 5: How would you describe MMC's current use of technology in its day-to-day manufacturing and business operations?

Follow-up: Which processes currently rely most on technology and which processes do you think need improvement or modernization? Why?

Response / Notes:

Question 6: What are the main business goals or pressures pushing MMC to consider modernizing its tech operations right now?

Follow-up: What specific results would make you consider a new technology rollout a success?

Response / Notes:

3. Industry and Competitive Analysis

Question 7: Do you feel MMC is falling behind competitors in the local manufacturing industry because of technology gaps?

Follow-up:

If yes, what specific tools or automated systems do your competitors use that MMC is currently missing?

If no, what technological strengths or operational advantages give MMC an edge over its competitors?

Response / Notes:

Question 8: How quickly can MMC change its production speed or order volumes when customer demand or market trends change unexpectedly?

Follow-up: What limitations in your current factory setup stop you from making faster decisions when market demands shift?

Response / Notes:

Question 9: What industry regulations, safety rules, or quality standards are currently the hardest for MMC to follow and keep track of?

Follow-up: How could automated data collection or digital tracking help you meet these quality and compliance rules more easily?

Response / Notes:

4. Specific Technology Areas

I. Artificial Intelligence (AI)

Question 10: How does MMC currently view the use of Artificial Intelligence in its manufacturing and business operations?

Follow-up: Where do you think AI could help managers or employees solve day-to-day operational problems?

Response / Notes:

Question 11: What main concerns does MMC have regarding the setup cost, accuracy, or reliability of AI systems?

Follow-up: What factory tasks are your supervisors most hesitant to hand over to automated AI software?

Response / Notes:

II. Machine Learning

Question 12: How does MMC currently monitor equipment performance and handle unexpected machine breakdowns?

Follow-up: Do you think analyzing past equipment data could help predict potential machine failures? Why or why not?

Response / Notes:

Question 13: Does MMC use historical sales and production data to train models that forecast future product demand?

Follow-up: How do you currently estimate how many items to manufacture each month?

Response / Notes:

III. Augmented Reality (AR)

Question 14: How does MMC currently help warehouse workers pick parts and locate inventory across the facility?

Follow-up: How could showing digital instructions on top of physical items make warehouse work easier or faster?

Response / Notes:

Question 15: How do you currently give repair instructions to technicians, and do you think using AR on mobile devices could make machine maintenance easier?

Follow-up: How do technicians currently access or refer to manuals and repair instructions while working on factory equipment?

Response / Notes:

IV. Internet of Things (IoT)

Question 16: Are your factory machines or storage areas equipped with connected sensors that collect and share real-time data?

Follow-up: If not, how do you currently track machine temperatures, operational speeds, or storage conditions?

Response / Notes:

Question 17: How could getting instant data alerts from machine sensors help supervisors fix production line issues faster?

Follow-up: How quickly is management notified when a machine stops working or runs slowly?

Response / Notes:

V. Cloud Computing

Question 18: Does MMC store its business and operational files on local servers, or does the company use cloud services?

Follow-up: How easy is it for managers to securely check production reports when working outside the office?

Response / Notes:

Question 19: What concerns does MMC have about moving its factory data to the cloud, such as Internet connection stability or data safety?

Follow-up: Has MMC ever lost work hours due to local server crashes or lost computer files?

Response / Notes:

VI. Big Data Analytics

Question 20: How does MMC collect and organize large sets of data coming from sales, inventory, and factory lines?

Follow-up: What tools or methods do you currently use to identify trends and patterns in this information?

Response / Notes:

Question 21: How could having real-time access to factory data help managers make quicker daily production decisions?

Follow-up: What stops MMC from getting fast, clear answers from its operational data right now?

Response / Notes:

VII. Quantum Computing

Question 22: How familiar is MMC's management team with Quantum Computing and its potential applications in areas such as supply chain planning?

Follow-up: How does management view technologies that may have long-term potential compared with technologies that can address MMC's current needs?

Response / Notes:

Question 23: What complex scheduling, production, or supply chain problems does MMC currently face?

Follow-up: What is the most complicated planning or calculation problem your team handles today, and what makes it difficult to solve?

Response / Notes:

5. Skills and Capacity

Question 24: Do your factory workers and office staff have the technical skills needed to use and manage modern technology tools?

Follow-up: What specific skills are missing most among machine operators and supervisors?

Response / Notes:

Question 25: What training programs or learning steps does MMC offer when introducing new equipment or software to employees?

Follow-up: How does management address employee fears or concerns about automation replacing jobs?

Response / Notes:

6. Budget and Implementation

Question 26: Has MMC set aside a specific budget for acquiring new tech tools and upgrading factory operations this year?

Follow-up: If you are comfortable sharing, approximately how much of MMC's budget is allocated to technology upgrades?

Response / Notes:

Question 27: What is MMC's planned timeline for putting new technology tools onto the factory floor?

- ☐ 0-6 months
- ☐ 6-18 months
- ☐ 18+ months

Follow-up: Why is this timeline realistic based on your current production workload?

Response / Notes:

Question 28: What do you think is the biggest obstacle or risk to successfully adopting new technology at MMC?

Follow-up: How does management plan to address this obstacle during implementation?

Response / Notes:

Closing

Final Question

Is there anything else you would like to share about MMC's technology needs, challenges, or plans for the future?

Final Statement

Thank you for your time, cooperation, and valuable insights. TechVision Consulting Inc. will analyze the information gathered from this interview to assess MMC's current technology readiness and identify suitable emerging technology opportunities. The findings will contribute to a technology adoption recommendation report designed to address MMC's operational challenges, improve efficiency, and support its digital transformation.

Additional Comments/Notes:

Interview Completion:

Interviewer's Name: _____

Date Completed: _____

Interview Duration: _____

Rubric for Evaluation:

Criteria	Excellent	Good	Satisfactory	Needs Improvement	Score
Completeness of Sections	All 9 sections complete and well-organized	7-8 sections complete	5-6 sections complete	Less than 5 sections	/15
Question Quality	Questions are clear, relevant, and probing	Most questions clear and relevant	Some questions unclear or irrelevant	Many questions unclear or irrelevant	/15
Coverage of Technologies	ALL emerging technologies covered thoroughly	Most technologies covered	Some technologies covered	Few technologies covered	/25
Alignment with Scenario	Questions perfectly match the MMC scenario	Questions mostly match the scenario	Some questions match the scenario	Questions do not match the scenario	/10
Open-Ended Questions	Excellent mix with effective probes	Good mix with some probes	Some open-Ended questions	Few open-ended questions	/10
Professional Format	Very professional, clean, and organized	Professional with minor issues	Somewhat professional	Disorganized or messy	/15
Practicality	Questions are practical and usable	Most questions are practical	Some questions are practical	Questions are impractical	/10

Total Score: ____ / 100
